CANUCK LAW
Reporting That You're Not Getting Elsewhere (Do Your Own Research To Verify)

APRIL 26, 2021 BY RONNIE

Cochrane Canada: WHO Partner; OST Partner; McMaster University Affiliate

Cochrane Canada is listed as a partner for the Ontario Science Table. However, there are important things about this organization that are not being publicly discussed. For starters,

Cochrane is partnered with the World Health Organization, and receives funding from them. Cochrane (the parent org) also gets funding from various Governments and universities.

What is the end result of this? Cochrane helps to legitimize the actions of the very Governments that it gets funded from. After all, it refuses to accept commercial funding.

It's a bit like the 2003 Iraq war. U.S. Government Officials leaked their "information" to various journalists. Those journalists were then cited as sources to show there were weapons of mass destruction.

> Cochrane is for anyone interested in using high-quality information to make health decisions. Whether you are a doctor or nurse, patient or carer, researcher or funder, Cochrane evidence provides a powerful tool to enhance your healthcare knowledge and decision making.

> Cochrane's members and supporters come from more than 130 countries, worldwide. Our ***volunteers and contributors are researchers, health professionals, patients, carers, and people passionate about improving health outcomes for everyone, everywhere***. Our global independent network gathers and summarizes the best evidence from research to help you make informed choices about treatment and we have been doing this for 25 years.

> We do not accept commercial or conflicted funding. This is vital for us to generate authoritative and reliable information, working freely, unconstrained by commercial and financial interests.

Cochrane appears to have legitimacy, because it only takes money from Government or academic sources. But then it publishes material that validates the actions and conclusions of those very parties. It's pay-for-play, but with very serious consequences.

The largest single donor to Cochrane (globally) is the National Institute for Health Research in the UK. But it's worth pointing out that the World Health Organization is high up on that list.

More than 1 million GBP

- National Institute for Health Research (NIHR) (UK)

- Danish Health Authorities (Denmark)
- National Institutes of Health (USA)

500k to 1 million GBP

As for the operation of Cochrane Canada, it is tied to McMaster University in Hamilton, Ontario. In fact, several people have an interest in that school.

McMaster is a major donor to Cochrane, as is the British Columbia Ministry of Health.

Let's clarify here: there are actually 2 separate entities. The Foundation is the group that distributes money to various organizations and institutions. The Foundation Trust, however, is concerned primarily about asset management.

BILL & MELINDA GATES FOUNDATION
EIN: 56-2618866

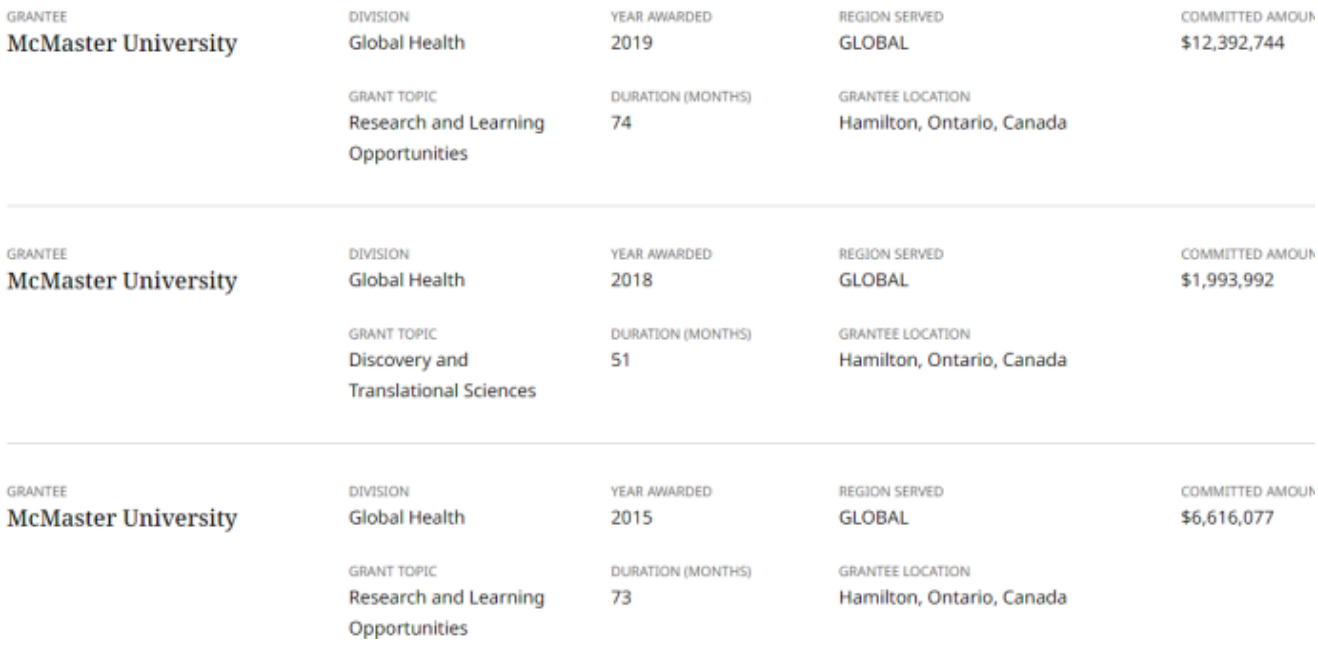
McMaster researcher plays key role in isolating COVID-19 virus for use in urgent research
March 13, 2020
RESEARCH FINDINGS
A McMaster researcher has played a critical role on a small team that has successfully isolated and grown copies of the virus responsible for COVID-19, enabling urgent Canadian research into how it behaves and how it might be controlled.

McMaster claimed to have isolated the virus that causes Covid-19. That's very interesting, considering that when Fluoride Free Peel did a freedom of information request for it, there were no records available.



GRANTEE	DIVISION	YEAR AWARDED	REGION SERVED	COMMITTED AMOUN
McMaster University	Global Health	2019	GLOBAL	$12,392,744
	GRANT TOPIC	DURATION (MONTHS)	GRANTEE LOCATION	
	Research and Learning Opportunities	74	Hamilton, Ontario, Canada

McMaster University	Global Health	2015	GLOBAL	$6,616,077
	GRANT TOPIC	DURATION (MONTHS)	GRANTEE LOCATION	
	Research and Learning Opportunities	73	Hamilton, Ontario, Canada	

$21 million from the Gates Foundation since 2015, according to their publications. Is McMaster University an institution we can trust, or has it been corrupted by special interest money and ideology?

Also, is Cochrane (either Cochrane Canada, or the parent organization) something that we can trust? Or is it just helping conceal the intentions of interested parties?
